

TANK COVER - ANTI ALGAE

The woven polypropylene Anti Algae cover supplied by IDAS is designed to cover and overlap the top edge of the tank. The woven polypropylene material offers excellent UV protection preventing Algae growth, wind-borne debris entering water and allows rainwater to permeate through.

The ball valve flap allows access for the supply as well as access for sampling the water.

Advantages:

1. Very Strong
2. Easy to install
3. Prevents algae growth and wind borne debris entering the water

<u>Specifications</u>	<u>Typical Value</u>
